

ARCTIC DEFENCE COLLEGE

The Learning that Builds Strength

Arctic Defence College (ADC) is a private training institution based in the Yukon, delivering industry-aligned education in applied technology for defence, cybersecurity, artificial intelligence, IT security, and telecommunications. ADC addresses critical skills gaps in Canada's North through strategic partnerships aligned to real operational and sovereignty needs.

Mission

To empower Indigenous Peoples, Canadian Armed Forces Veterans and Reservists, and the Canadian Rangers with the technical competency and leadership skills required to defend Canada's critical digital infrastructure and support national security objectives.

Vision

To cultivate a digitally secure and sovereign North by delivering world-class, northern-grounded cybersecurity and defence-aligned education that strengthens communities and reinforces sovereignty.

Programs & Delivery

Programs are modular, stackable, and competency-based, including micro-credentials, certificates, and diploma pathways. Delivery combines remote learning, cyber range labs, and workforce-integrated experiences designed specifically for northern and remote contexts.

Strategic Partners

Developed in collaboration with Arctic Training Center Inc. (ATC), and 123 Cyber Inc., ADC aligns education with Arctic defence readiness, telecommunications infrastructure, and cybersecurity governance requirements.

Leadership

Steve Gregory · Arjun Grewal · Micheal Mooney

Educated by the North. Ready for the World.
